Notes

Issue	Stakeholder	Notes
UITEAM-372: Remove (temporarily) exclude links form field from datasource creation and editing DONE	@Dmitriy Lyner	Current sprint: Temporary removal of exclude link
UITEAM-373: Bring back exclude links form field with feature flag DONE	@Dmitriy Lyner	Next sprint to bring link back
Demo Script	@Sanket Shahane (Deactivated) @Yauheni Buracheuski (Deactivated)	Which URLs will be scraped during demos? We are now able to share demo script more broadly @Yauheni Buracheuski (Deactivated)

Action items

- [ ] @Sanket Shahane (Deactivated) to sync w/ @Yauheni Buracheuski (Deactivated) on highlighting limits
- [x] @Dmitriy Lyner to create 1pt Jira ticket and include here (link dependency "blocked" by CE, Connector, and UI work currently scoped)
- [ ] Outline the exact URLs for reference application demo @Sanket Shahane (Deactivated)
- [ ] API Scope updates: @Sanket Shahane (Deactivated) to follow up

Decisions

⅄ @Yauheni Buracheuski (Deactivated) : exclude link - missing CE work (@Elizabeth Edmiston to review and prioritize CE-1331)

⅄ Demo to work around the UI feature that isn't hooked up to the connector yet (@Yauheni Buracheuski (Deactivated) to add amplifying info here)
